

YOU SAID, WE LISTENED

April 2022

Breastfeeding survey suggested that support is not always readily available

Several women reported that they did not feel listened to regarding their pain in early labour

Infant Feeding Steering Group created to develop a clear strategy to improve breastfeeding support for all

Reviewed the Induction of Labour patient information leaflet, adding a section on the expectation of pain and what can be done to help and the information available in the induction bay to make this more accessible. Disseminated feedback to ward midwives

Focus group that includes service users has been created to drive forward improvements
Working with StartWell to develop peer supporter opportunities

Will be making one of the side rooms into a sitting room with drinks facilities etc where patients can sit or more freely mobilise
